BOYS AND MEN FOR
GENDER EQUALITY

Working to engage men and boys to promote gender equality

AN OVERVIEW OF NAMEN

NAMEN—The North American MenEngage Network—is a bi-national network of organizations and individuals across Canada and the USA working to engage men and boys to promote gender equality. NAMEN works in the following areas:

- Sexual and reproductive health and rights,
- HIV/AIDS prevention and treatment,
- Reducing violence against women and girls,
- Challenging homophobia and advocating for LGBTI rights,
- Reducing other forms of violence between men and boys,

- Addressing the role of boys and men in child sexual exploitation, sexual abuse, and trafficking,
- Promoting men's positive involvement in maternal and child health and as fathers or caregivers, and
- Efforts to change macro level policies that perpetuate gender inequalities.

NAMEN is a part of the global menengage network, menengage.org, and as such, is a part of an international network providing members with access to resources, tools, and lessons learned from throughout the world.

WHAT WE DO

NAMEN is a network. As a network, most of what we do is generated by our members.

We provide a means by which members (individuals and organizations) can connect with each other regarding their efforts to engage men and boys. We also share resources and materials, and offer regular webinars about a variety of topics related to engaging men and boys.
